Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, drawn to demodulating a pattern using the filtering process, classified in class 382, subclass 260.
 - II. Claims 15-22, drawn to estimating the orientation angle of pattern, classified in class 382, subclass 216.
 - III. Claims 23-27 and 34-38, drawn to estimating the phase shift between patterns, classified in class 382, subclass 191.
 - IV. Claims 28-32 and 39-43, drawn to estimating spatial phase of pattern, classified in class 382, subclass 210.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I, II, III and IV has separate utility such as image filtering, image orientation, phase shift of the images and spatial filtering respectively. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2623

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
